SUPER INSULATION MAINTAINS HOT OR COLD

Designed for durability and ease of use

THERMAL BAGS Deliver Your Meals at the Right Temperature... Hot or Cold!

Designed for durability and ease of use...

- ✓ Excellent heat or cold retention
- ✓ Durable top quality materials
- ✓ Light-weight, with a built-in frame for stability.
- ✓ Easy to load and unload
- ✓ Quick-clean, spill-proof removable ZIP-liner and bottom tray.

Innovative high R-value insulation throughout keeps meals at the right temperature.

- Two-way zipper makes it easy to open part of the top to take meals out.
- Insulated pad keeps heat in the bag while loading or unloading meals.

Makes your job easier!

- Light-weight, with a built-in frame for stability.
- Solid tray on bottom for a firm surface, reduces spillage.
- Durable and easy to clean vinyl bottom.
- Top and front pockets for routing slips.
- Easy to grasp pull tabs and thongs with quality YKK metal zippers.

Durable top quality materials

- Abrasion and fluid resistant outer shell of rugged Cordura® HP. Inner wall is waterproof 400 denier coated nylon.
- High-strength vinyl liner zips out for easy cleaning. Liners are replaceable.
- Durable, adjustable shoulder straps of 2" nylon webbing with long-lasting metal buckles for strength and security.
- Hand grips for effortless carrying.
- Reinforced straps are securely sewn onto the bag and down to the bottom for optimum support and strength.

PATENTED light-weight frame maintains bag shape.

REUSABLE TRAYS

The Cost-Effective Choice... and They Save the Enviro

REUSABLE TRAYS offer a beautiful presentation of your meals, while you save your budget! Available in four depth configurations and two temperature ranges to meet your program's serving needs.

Saves landfill space and the environment.

See our website for "Tips on starting or converting to a reusable tray program."

- Easy-Open Lids
- Microwave Safe
- Freezer Safe
- Dishwasher Safe
- Stackable with or without Lids

★ MADE IN USA ★

Home-delivered meals make care giving easier and less stressful.

Deep dish (left) and Standard (right) REUsable Trays

CLASSIC REUSABLE LEEDS TRAY

-40° to +260° F A "best buy" for meals served hot or cold or where only microwave heating is required. Color: Sand

Reusable Trays are available in Standard or Deep Trays, and Standard or Raised Lids.

Standard Tray, Standard Lid – Depth 1-5/8"

Deep Tray, Standard Lid – Depth 2-3/8"

Standard Tray, Raised Lid – Depth 2-1/4"

Deep Tray, Raised Lid – Depth 3"

Compartment capacity in fl. oz.

REUsable BOWL & LID

-40° to +260° F (bowl)

Use for soup, salad or dessert. Bowl and lid microwave safe. Stackable with or without lids. 2 oz. of extra room in each bowl. Color: Sand

6 oz.
1-3/4" h
4-3/8" dia.

8 oz.
2-3/8" h
4-3/8" dia.

All tray sizes are "industry standard" 6-1/2" wide x 8-7/8" long

ment!

COMPARE FOR YOURSELF. Using REusable Trays saves you big bucks!

When you get past the initial resistance and actually look at what's involved in using reusable trays, they're just as easy as any other kind of tray.

HERE'S WHAT'S LEFT AFTER ONE YEAR!

The lowest average cost of three common disposables (including lids) to REusable trays.

COST FOR 2 YEARS - PER 100 CLIENTS

Coated paper	\$ 7,800.
Plastic	11,500.
Aluminum	14,100.
REusables	1,500.- 1,800.

261 delivery days in a year.
Each client uses one disposable every day.

You would only need two REusable trays for each client, as there is usually one tray being delivered and one being returned.

No matter which disposable tray you compare to any size of our REusables, you'll save money AND the environment!

Benefits and disadvantages of tray products:

Polystyrene foam: leaks, spills, and sometimes cracks, but are cheap and spacious, and rarely used.

Aluminum trays: stable and spill free, but cost more.

Reusable trays: high-strength plastics for repeated use and washings. Lower cost per meal, lower environmental impact, and improved appearance. Minimal effort to return and sanitize (cost is offset by the hidden costs* of disposable trays).

Lightweight plastic trays with clear, heat-sealed lids: dual ovenable, but are high cost, sometimes recyclable, most go to the landfill or incinerator.

Plastic-coated cardboard trays with clear, heat-sealed lids: dual ovenable, non-recyclable in much of the country, and often just thrown away.

* Inventory maintenance, frequent issuing of payments to tray vendors and the accounting costs associated with such payments, shipping and distributing.

While every program decides which trays to use based on their own resources and abilities, *we know from being in the meals on wheels equipment business for over 40 years REusable Trays are the best buy!*

Helping elders to keep their way of life in the community, in their homes and to be with family and friends.

ACCESSORIES

Pocket Dial Thermometer

Model TM220A

Tough, durable and accurate. Plastic watertight magnifying lens. Stainless steel. Adjustable nut for hand recalibration. With pocket clip sleeve. 1 year limited warranty.

Digital Thermometer with protective rubber boot Model TM300B

Simple, compact styling at a great price! Range -40° to 300° F. Accuracy ± 1%. Boot makes thermometer ruggedized and water resistant. With pocket clip sleeve.

Flat Digital Thermometer

Model TM300P

Waterproof with membrane key pads. Fits flat in shirt pocket. Stands up to constant use in wet/humid conditions. °C/°F switchable. Field calibrates. 1.5 mm tip assures reliable testing of thin foods. Range -58° to 300° F ± 2° F.

For Transporters and Thermal Bags

Heat and Cooling Units

Our heat units and cooling units can add extra hours of temperature control to your programs. The thick foam insulation in the two-compartment transporter provides the ability to cool one compartment and heat the other. Units take up little space but add longer temperature retention per compartment. Size: 6" x 6-3/4" x 1"

Heat Unit

Helps maintain food temperatures above 140° for up to FOUR hours. Keeps food hot without cooking away nutrients, texture or taste.

Cooling Unit

Helps keep food cold all day. Even in the hottest weather. Holds up in repeated daily use.

For Regular Transporters

3-Shelf Rack

for Extra Convenience!

Shelf racks make removal of trays easier. Perfect for milk, deserts, salads or juice cups. Also can be used to stack up to 7 aluminum trays. Vinyl-coated steel. Shelf rack fits either compartment. Snaps in securely.

For Thermal Bags

Electric Bag Heater

Keeps meals hot, especially on long delivery routes. Fits all Nutri-Systems Thermal Bags as well as many others. Plugs into the car cigarette lighter (12 volt DC). Lightweight with a 7 ft. cord. Flat panel (8-1/2" x 13").

For Electric Transporters and Electric Thermal Bags

- 10 Foot DC Extension Cord (for car power outlet, cigarette lighter)
- DC Car Power Outlet (cigarette lighter) Doubler
- AC to DC Power Converters (6 amp)
